CP Violation in charm and other LHCb charm results

mardi 6 mars 2012 18:50 (15 minutes)

LHCb's vast heavy flavour datasets provide a new opportunity for precision tests of the Standard Model and searches for New Physics such as new sources of CP violation in charm decays, and new physics contribution to highly suppressed decays such as $D \rightarrow \mu\mu$.

Auteur principal: Dr RADEMACKER, Jonas (University of Bristol)

Orateur: Dr RADEMACKER, Jonas (University of Bristol)

Classification de Session: Heavy flavour and charm physics

Classification de thématique: Experiment
