### Session VIII: Non-supersymmetric models & Dark Matter - Amphithéâtre Recherche (13:30 - 15:45)

time	[id] title	presenter
13:30	[9] Gluino, wino and Higgsino-like particles without supersymmetry	RAY, Tirtha
13:50	[10] Higgs boson production via vector-like top-partner decays	BONDU, Olivier
14:10	[37] Heavy Dark Matter - the outstanding role of (2,0) KK modes in resonant cross sections to the relic abundance calculation on the 6D Real Projective Plane	KUBIK, Bogna
14:40	[36] ZN symmetry and dark matter phenomenology	BELANGER, Geneviève
15:15	[35] Mixed sneutrino dark matter in light of recent experimental results	DUMONT, Béranger
