Transfer metadata across Frontiers

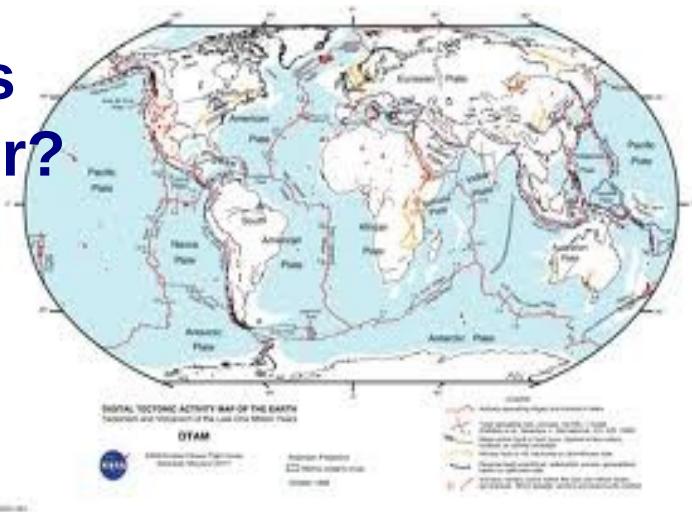

Conditions data refers to nearly all the non-event data produced during the operation of the ATLAS detector, together with that required to perform reconstruction and analysis¹.

Atlas Detector at CERN

Hundreds GRID site beyond the Frontiers

How
Conditions
Data transfer?

Transfer metadata across ... Frontiers

In the case of Condition Data from *ATLR* are transferring down to the Atlas payload (jobs) by :

a distrusted network of read-only replicas of the central *ATLR DB* (CERN) on selective

Tier1 sites (**FR**, **UK**, **DE**, **US**, **CA**)

and the employment of the **Frontier system**

Frontier System :

A System for Data Distribution from a Central DB to Many Client System²

Frontier uses HTTP based Protocol (Rest Arch)³

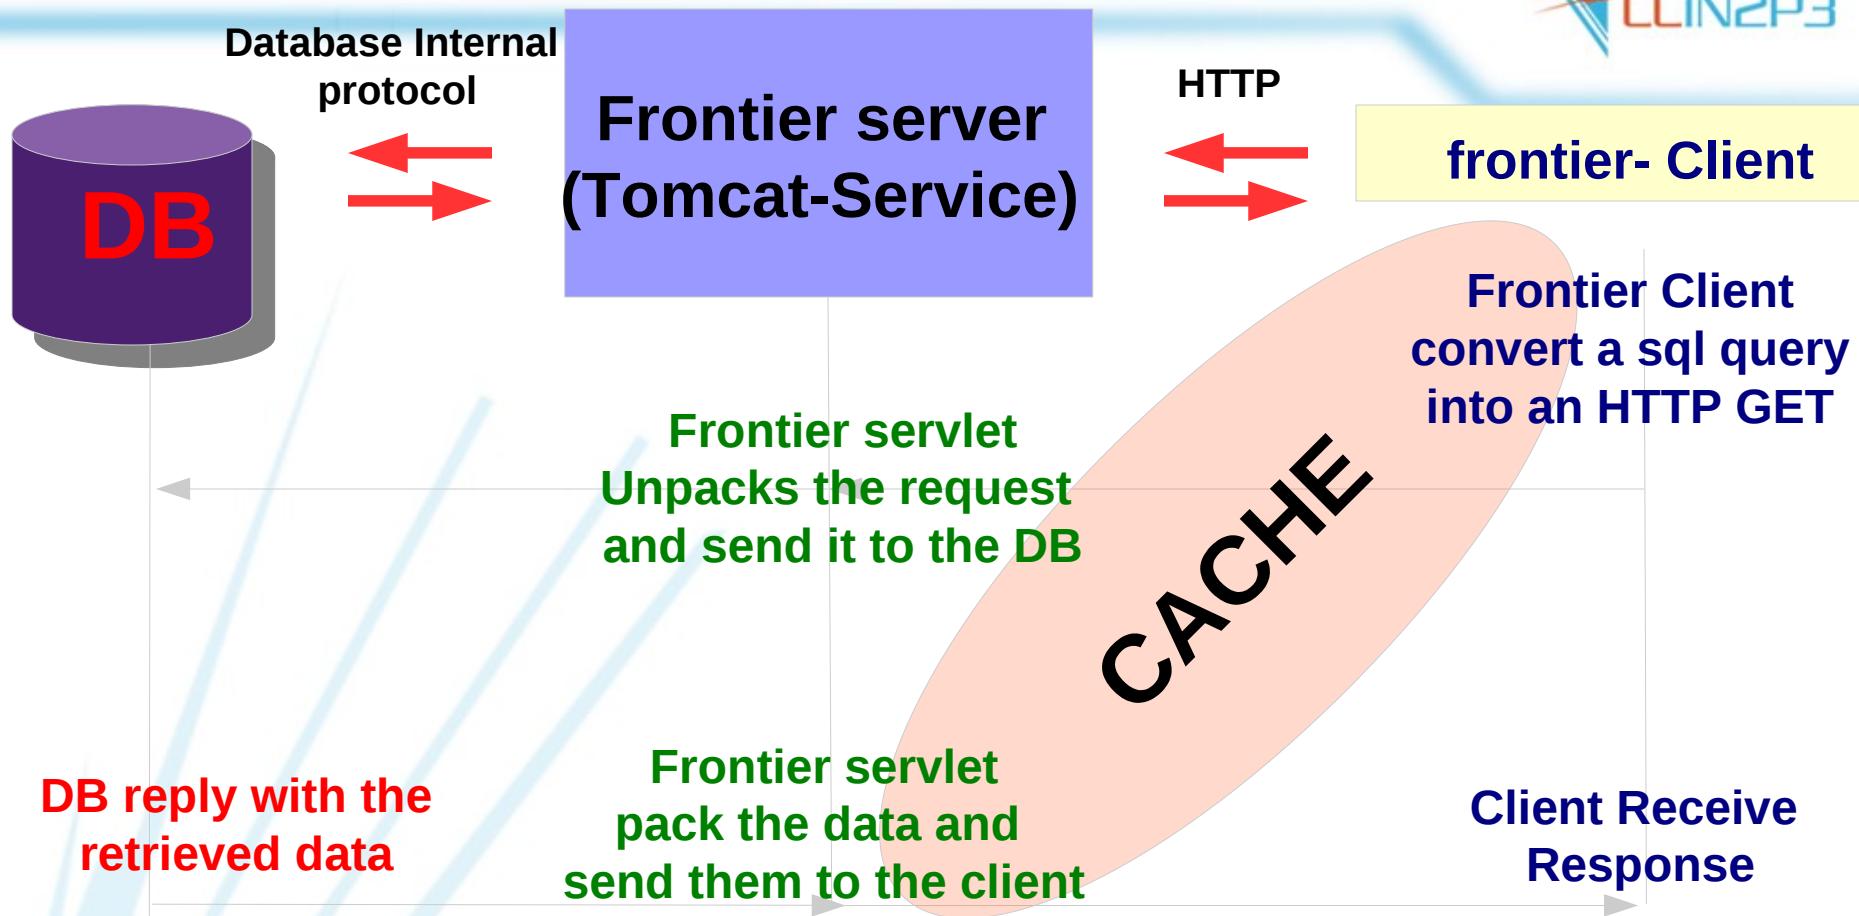

Developed at FermiLab

Adapted from LHC experiments at CERN: CMS, ATLAS and now LHCb to access "*conditions data*" at all their sites worldwide.

Frontier System⁴:

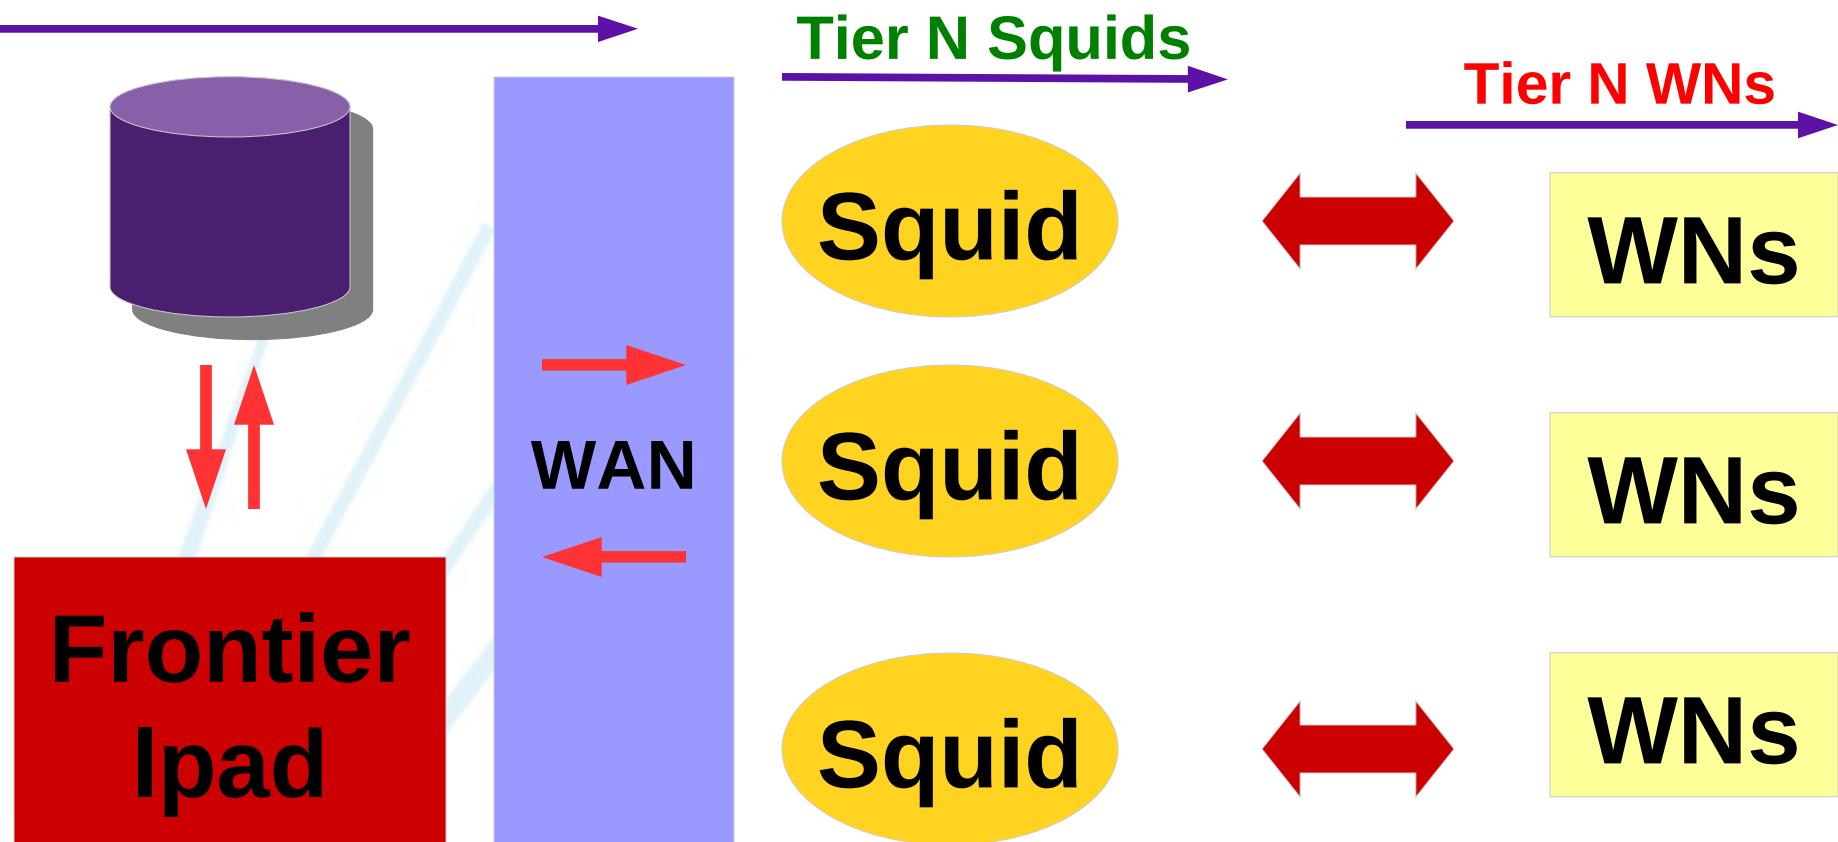

Atlas Frontier System

RO Replica of the
ATLR Database

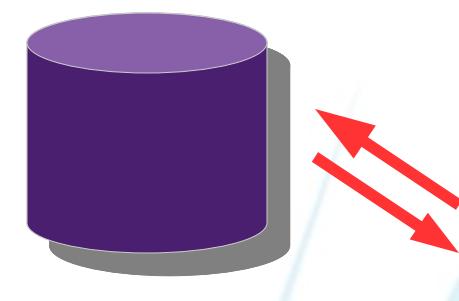

Frontier Launchpad

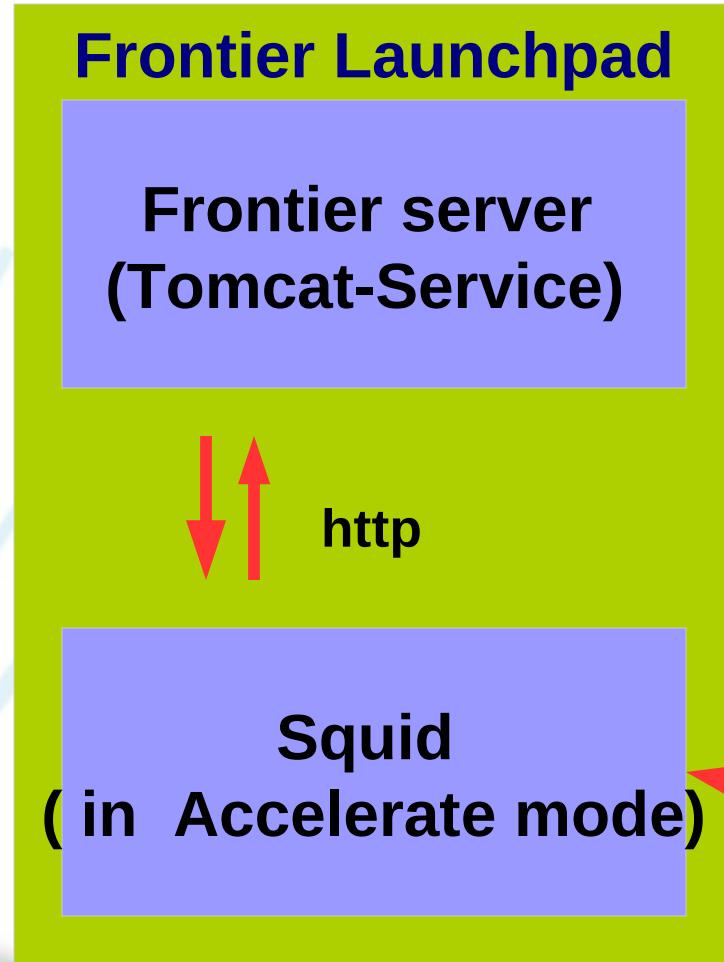

ATLR REPLICA

Database Internal
protocol

Squid in Accelerate mode: this squid can cache only one site (frontier-Tomcat Service) and can't be used as a general cache squid

■ *Two Frontier-lpad*

- under DNS load balancing
- Alias: **ccfrontier.in2p3.fr**

■ *Two site squids*

- only for the Frontier dedicated usage (acl on destination)
 - under DNS load balancing
 - Alias: **ccaltassquid.in2p3.fr**
- Site squid serve also different sites (**CPPM, LPC, LPSC**)

French Cloud

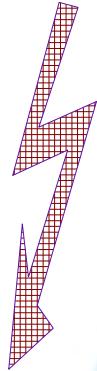

FRONTIERs	SITE SQUID	SITE
	IN2P3-CC	CPPM/LPC/LPSC
	LAPP	
	GRIF (LAL)	LHNPE
		SACLAY
		LAL
	IRFU	
IN2P3-CC: PRIMARY	BEIJING-TOKYO	
RAL: FAILOVER	RO-02-NIPNE	RO-14-ITIM
	RO-16-UAIC	
	RO-07-NIPNE	
	ES CLOUD	

First Service configure via AGIS

AGIS

*Atlas installation
machinery*

SITE

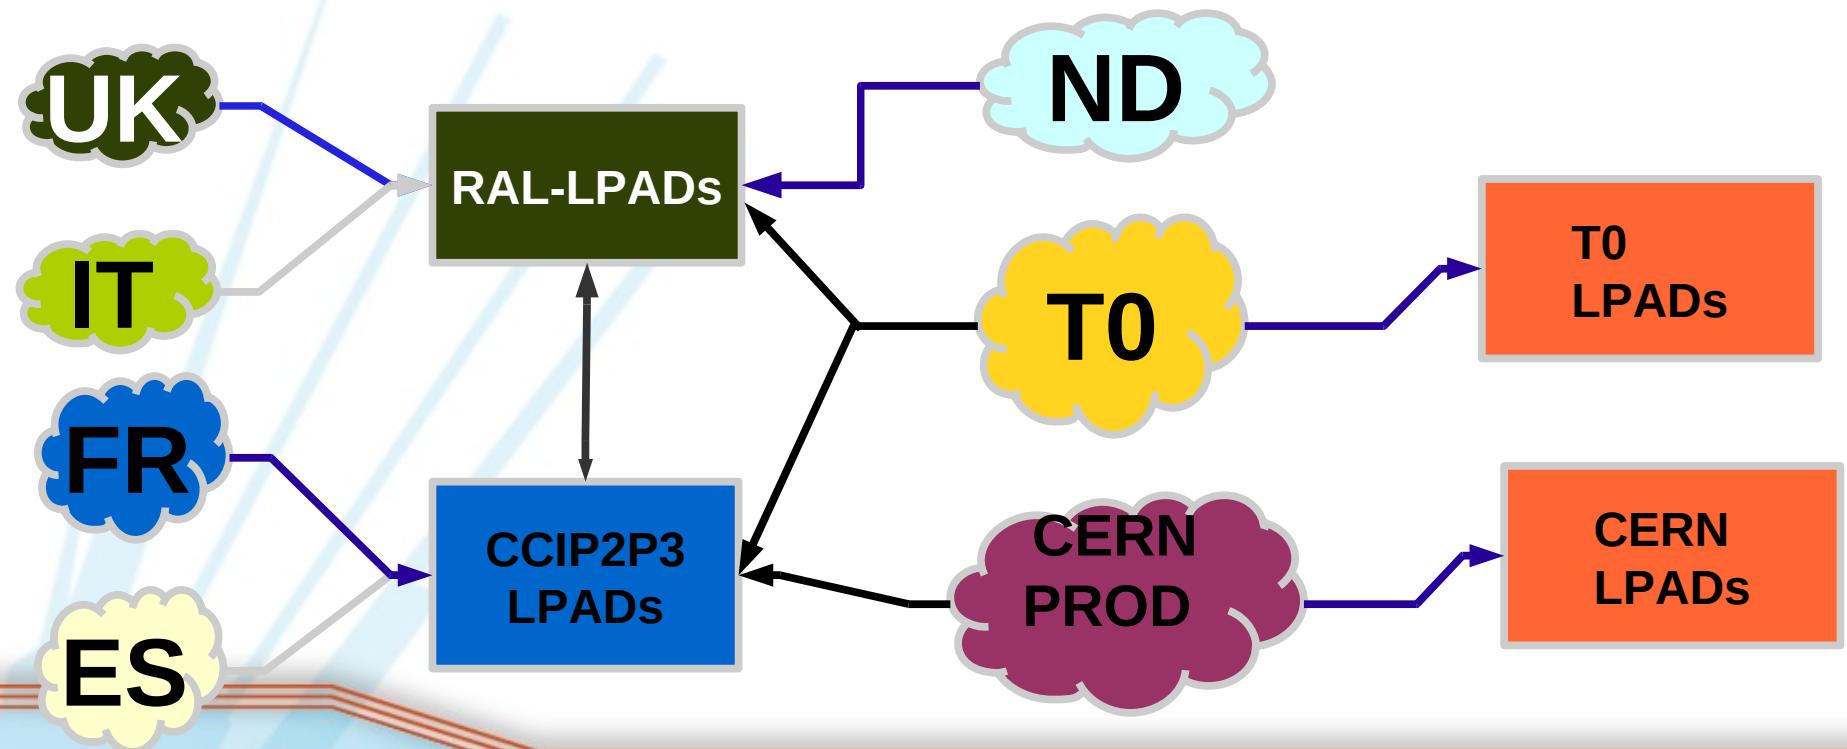

*add to the local setup of the site a
environmental variable with a specific
format ...*

```
...  
FRONTIER_SERVER="(serverurl=http://ccfrontier.in2p3.fr:23128/ccin2p3-AtlasFrontier)  
(serverurl=http://lcgft-atlas.gridpp.rl.ac.uk:3128/frontierATLAS)  
(proxyurl=http://ccsqfatlasli03.in2p3.fr:3128)"  
...
```

Topology & Fail-over

*Failover in the level of the client :
if a Frontier server fails then the client (frontier lib)
will try other Frontier in order to get their data*

Central Monitoring of Frontier-Lpad and Squid

- **Service Level Status of ATLAS launchpad servers(SLS)**
 - <https://sls.cern.ch/sls/service.php?id=ATLAS-Frontier>
- **Awtats monitoring for Frontier-launchpad** (A nice open source tool that generates advanced squid-proxy,web, ftp ,mail server statistics: (Domains/countries, Host, Number of visits, TCP_HIT, TCP_MISS))
 - <http://frontier.cern.ch/awstatsatlas.html>
- **MRTG Monitoring :** (Request/Fetch – in/out Trafic- Count object)
 - <http://frontier.cern.ch/squidstats/indexatlas.html>

Operational issues (!)

■ Service Criticality:

- *Frontier Criticality: **High** Allowed downtime: **Less than 1 day***
- *Frontier_squid Criticality: **Moderate** Allowed downtime: **Less than 2 days***

■ Guideline ADCos (24/7) :

- “... Shifters should check the Frontier monitoring once per shift and if problems are observed non-urgent GGUS tickets can be submitted.. “

■ Definition of the Frontier-LPad + **Frontier_Squid** in GOCdb ?

- *Frontier-pad: The Shiftier can track overlapping down times (via AGIS)*
- *Frontier_squid: Complicated the definition of DT as there services is Particular for one VO ?*

CC Frontier-Lpads are under the “eyes” of Astreinte

Further Steps

- **Finalized the test of the second site squid**
 - Put service in production
- **Define secondary squid (GRIF)**
- **The configuration for the T0**
 - Starting second servlet (on existing Lpads) with cache expire time 15'
- **Introduce local mrtg monitoring for all involved squid servers**
- **Define the Frontier-lpad in the GOCDB according with guideline of Operation Team and GridAdmins**
 - Request from Atlas

Further Information

ATLAS Frontier Project

<https://twiki.cern.ch/twiki/bin/viewauth/Atlas/FroNTier>

by Alastair Dewhurst (RAL) (cord.)

Meetings are held bi-weekly on Wednesdays at 16:30 pm local time.

***!!SPECIAL THANKS!! TO CC-IN2P3
COLLEGUES FOR THEIR CONTRIBUTION
TO THE OPERATION OF THE FRONTIER
SERVICE FOR THE ATLAS VO***

***!!SPECIAL THANKS!! TO ATLAS FRONTIER
GROUP FOR THE FRUITFULL DISCUSSION
AND FOR THE HELP***

Thank you for Your Attention

BACKUP

Site requirements:

ATLAS requests that selected T1 sites install both **Frontier (launchpad)** and **Local Squid servers**

and that each Tier 2 site install **one local Squid instance per 500 user analysis batch queue slots hosted at their site**

(ref: ATLAS Trigger and Offline Board [TOB], September 16, 2009).
