Towards storage federation and optimized data access

mercredi 19 septembre 2012 09:30 (30 minutes)

ALICE has been using xrootd storage federation for quite a long time to optimize grid resources utilization. This talk will recall why federation and remote access via WAN appear as the way to go for WLCG storage & data management and focus on the related networking-related topics.

Orateur: GRIGORAS, Costin (CERN)
