

Workshop on Geophysics and Gravitational-Wave Detectors

mardi 17 avril 2012

Geophysical measurements with Virgo - 108 -- 1st floor -- Salle du Conseil (14:00 - 19:00)

time	[id] title	presenter
14:00	[8] Virgo seismic ground sensors and example of their use	FIORI, Irene
15:00	[7] Measurement of weak geodynamical effects (including inner-core movements) with tilt meters and long-base hydrostatic levels	MANUKIN, Anatolii
16:00	[3] Analysis of low-frequency geodynamical signals in large-scale GW interferometers	RUDENKO, Valentin
17:00	[9] General discussion
