

## Fédération de Recherches Interactions Fondamentales

### LPNHE-LPTENS-LPTHE

Physique Nucléaire et de Hautes Énergies, Reynald Pain,	Physique Théorique de l'École Normale Supérieure, Costas Kounnas,	Physique Théorique et Hautes Énergies Olivier Babelon
---	---	---

3 laboratories making a “Fédération de recherches”

in partnership with the Chair “Particules élémentaires, gravitation et cosmologie” of the **Collège de France** (G. Veneziano).

## Fédération de Recherches Interactions Fondamentales

Its purpose is to increase exchanges between our laboratories and to strengthen their scientific life, through the organization of common seminars, visits of foreign scientists, lectures at (post)doctoral level and research workshops.

And in particular, to foster  
exchanges between experimentalists and theorists.

In those respects, the current meeting “GDR Terascale@Paris”, organized jointly by two labs of FRIF, is quite exemplary !

Its program looks promising and exciting...

... so I wish you a very fruitful workshop !
