

GNO-I

- Global Neutrino Observatory (GNO)
- October 2012: Lol sent to boards of Antares, Baikal, IceCube, KM3NeT
- Proposal to form GNO-I
 - Forum for exchange and consultation
MANTS meetings, regular teleconferences
 - Framework for coordination cooperative actions and self-organization
Combined sky maps, cross-check results, alert/multi-messenger policies, exchange/check software, common software pool, common effort to connect better to particle physics tools, standards for data representation, exchange of expertise, GNO-internal advisory committees
 - Exchange of PhD students
 - Common organization tools/topical workshops (e.g. VLVnT)
 - Creation of common web page/outreach
 - Coordination of relations to other fields of science
 - Annual award for the best PhD thesis
 - Exploring closer cooperation within GNO-II
- Form a GNO-board
- Prepare a MoU for GNO-I
- *All partners are positive about the proposal, they are waiting for the reaction of KM3NeT*
