

Thank You

Graspa 2013

(Photocopy for everyone)

To everyone at LAPP, all the teachers,  
all the intern students, Myriam, Pablo,  
Lucia, Michael, Julien, Basil,

This is a short letter, so that we  
can all say a few words and  
thank you for running this course  
and all the effort you have put in,  
we have all thoroughly enjoyed it

Thanks so much for taking the time to organise  
the school. I have had such a good time and  
learned a huge amount. I am definitely looking  
towards doing doctoral studies in Particle Physics  
or Astrophysics in the future.

Tim Ogier.

It's not an easy task to receive so many people at once and  
provide them with all the things they need. Not easy, indeed.  
But the teachers at LAPP, all the organisers, the students  
also, made sure we were happy and aware of our respon-  
sibilities + that come with making part of something this  
huge. For physics, for this neverending search for truth  
(scientific truth!) and perfection, I thank you and hope  
we can work someday together.

Ester Simón

Thanks so much for this opportunity. Thanks of you we  
~~can~~ met so many interesting people who love physics and  
we learn a lot of new things. It was one of my best  
experience of my life and It's all because of you! Maria P.

Many thanks to everyone involved in providing us such a wonderful experience, combining a very complete and interesting academic programme, with an extremely rich experience at a personal level. I will always remember the Annecy Summer School ~~by~~ not only by the compelling beauty of the region, but especially ~~by~~<sup>for</sup> the warm smile of everyone involved, from lecturers to the remaining students. I will certainly be back!

Pedro Carneiro

Everyone was so happy to be here and teach, it made education an enjoyable and personal experience; how universities should be: they could learn a lot from you.

Many thanks again.

Ed Mahoney

Thank you all for this amazing opportunities. I enjoy stay here and I learn many things, and meet you and the other students. I think that this kind of experiences increases the pleasure for knowledge, so thank you very much again.

Sara Mancino

First of all I'd like to thank the teachers and the students for providing us such a rich experience, not only at an academic level but at a personal level as well.

You've been able to create something really good by getting together students of many different cultures to learn a little bit more about Physics.

Thanks again for the wonderful experience.

Ana Rodrigues

Many thanks to all teachers, researchers, students and to all others that made possible the realization of this Summer School.

It was a wonderful lifetime experience: very nice people of many different cultures, some of the most beautiful regions I've ever seen and really good Physics lectures (some days too many! :)).

This school made certain my decision of doing a PhD in Particle Physics in the not so distant future.

It was a great week. Thank you all!

André Patrício

Thanks for inviting us here to LAPP! I really enjoyed the stay here! The lectures were very interesting and very well done. You really managed to convince us that the field of particle physics is very interesting. It was also great that you could organize a little tour around your laboratories! The atmosphere here was great and Annecy is a very, very beautiful town! I had a great time here, thanks for organizing the school!

Angela Bopp

This course has been an unique chance to get in a class room with particle physics and, of course, to know other students from all around Europe, making stronger the bonds between our countries. For all this we call Thank you for the great effort of organizing the school, and provide us with a good experience.

Ana Paula Miller Vidal.

Thank you for giving us this opportunity to meet researchers and students at the LAPP which is a really nice lab! This week was intense! Good luck for next editions of GraSPA school.

Matthias Lorentz

I really want to thank the LAPP for this opportunity of meeting researchers and knowing people from all over Europe. It was amazing and after these lectures I am more fascinated by physics!! Thanks also to the organizers, I know it was not easy.

Thank you very much

Alvaro Lopez

Thank to the providers of GRASPA Graduate school: For me, it was a great experience and a gentle journey into Astro & particle physics world. The lectures, organisation and 5 days last at the lab were unique, quite enriching and interesting way to learn about Astrophysics. Thank you for your efforts, enthusiasm and Deep motivation that you show us.

Sincerely. Gilbert.

Thank you all for this week of lectures and fun! It was really great to have the opportunity to taste the world of research, and astroparticle, particle physics. It confirmed the fact that this is what I want to do later. All the lecturers ~~passed~~<sup>gave</sup> us their passion. See you hopefully next year for an internship.

Yassine Alg Hakim.

Thank you very much for everything. Hope this can be repeated more often.

Ali R. Kholife

Thank you very much for the time and effort you have given to organising such a fantastic week of lectures and events. The lectures were brilliantly interesting and stimulating. You have increased my interest in physics,  
Thank you,  
Jessica Dendusa
