Hardware & software specification

The Budapest T2 Site

The site supports ALICE and CMS experiments.

Capacity:

- Total CPU slots: ≈ 500 core ($\sim 1\%$)
- Total storage: ≈ 300 TB disk ($\sim 1\%$)

Resources are shared between ALICE (1/3) and CMS (2/3).
ALICE pledged: 167 core, 72 TB storage.

The Budapest T2 Site

The site is fully *virtualized*:

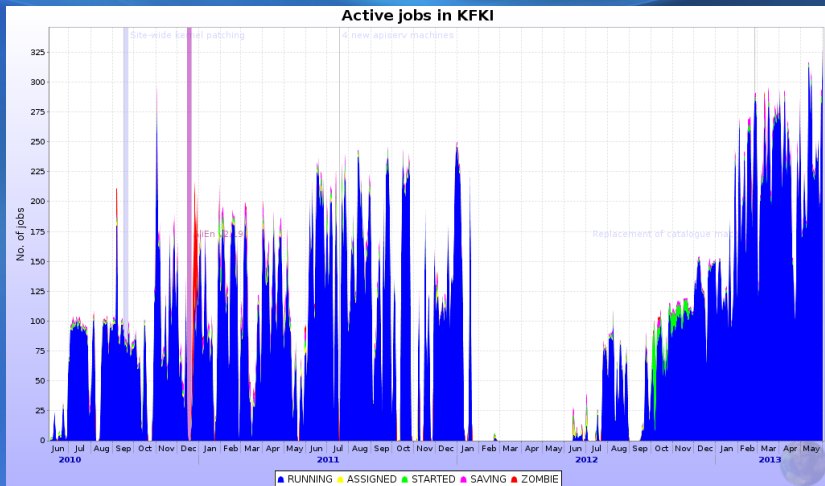

- 6 KVM (Kernel-based Virtual Machine) servers
- UI, GE, CE, BDII, WMS, MyProxy are on virtual hosts
- ALICE VO-Box will be virtualized on next update

Cluster management:

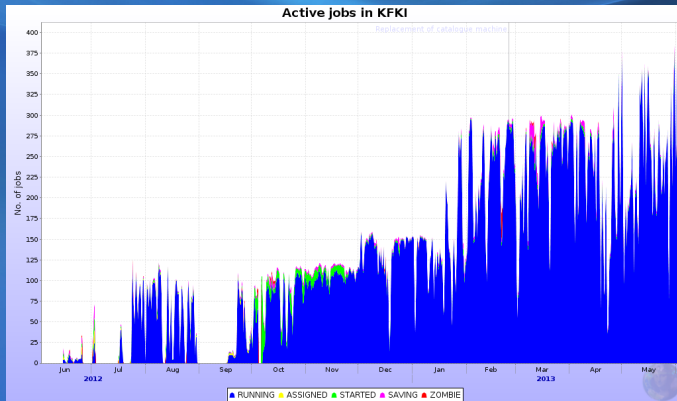

- Backup system: Amanda Network Backup
- Logging: central logging with syslog-ng
- Monitoring: Nagios and own scripts
- We use test machines if needed as well

What we want?

The last 3 years of the Budapest ALICE T2

The last 1 year of the Budapest ALICE T2

Traffic IN						Traffic OUT					
Series	Last value	Min	Avg	Max	Total	Series	Last value	Min	Avg	Max	Total
1. grid128.kfki.hu	344.8 KB/s	0.702 KB/s	1.986 MB/s	150.3 MB/s	59.67 TB	1. grid128.kfki.hu	30.1 MB/s	0.24 KB/s	10.82 MB/s	228 MB/s	325.2 TB

The last 6 months of the Budapest ALICE T2

Our aims

Our main goals are:

- to create a comprehensive documentation [OK]
- to build a clear, working, up-to-date system [OK]
- to create redundant, fault-tolerant system [OK]

The information needed for our operation is collected on our own TWiki page.

Useful stuff

On our TWiki page there are many useful things:

- We have created a short *WLCG introduction* for our users
- One can see our introduction on the ALICE services
- There is a *Troubleshooting* section for solving common problems
- In our *Logbook* we are logging not only the problems we encounter, but the solutions as well

Never forget to document your experiences for the future system administrators!

Site service experiences

Site service experiences

The ALICE services are quite stable nowadays.

However, we had storage data inconsistencies because of data movement during former storage expansions.

- By removing unnecessary files we've got 15 TB free space.

We have created a python script which sends alarm messages when the site's job load is much less than the overall ALICE GRID load.

- Can be found under <http://gregory.web.elte.hu/grid/>.

Most problems can be solved by service restart.

When we want?

Future plans

REBUS: Federation Resources

Topology | **Pledges** | Capacities

Pledges > Federation Resources

Year: 2013

Note: Sorting by multiple columns at the same time can be activated by 'SHIFT' clicking on the column headers which they want to add to the sort. Hovering mouse over the column headers to get descriptions of table columns.

All Tiers | Tier 0 | Tier 1 | Tier 2

Search:

Country	Federation	Pledge Type	ALICE	% of Req.	ATLAS	% of Req.	CMS	% of Req.	LHCb	% of Req.	SUM	% of Req.
Hungary	HGCC Federation	CPU (HEP-SPEC06)	1,100	1%			3,200	1%			4,300	1%
Hungary	HGCC Federation	Disk (Tbytes)	72	1%			210	1%			282	1%

OK

- VO-Box update and virtualization in a few weeks
- Storage upgrade (73 TB → 90 TB) by the end of the year

Thanks for your attention!
