

## Rare dileptonic $B_{(s,d)}$ decays at LHCb

*mercredi 4 décembre 2013 12:10 (25 minutes)*

After a general introduction concerning Flavour Physics in the framework of the Standard Model, two of the so called “golden channels”  $B_{(s,d)} \rightarrow l\bar{l}$  (with  $l = \mu, \tau$ ) to test Standard Model predictions and possible New Physics scenario will be discussed, together with an overview of their experimental searches and BR measurements performed with the LHCb detector.
