

Cosmic rays & their interstellar medium environment CRISM-2014

Tuesday 24 June 2014 - Friday 27 June 2014

Montpellier, France

Recueil des résumés

Contents

3D simulations of the emission from young supernova remnants including particle acceleration	1
A Catalogue of High-Energy Observations of Galactic Supernova Remnants	1
A database of charged cosmic rays (CRDB) and constraints on the interstellar flux	1
A solution to the cosmic ray anisotropy problem	1
APEX observations of non-stationary magneto-hydrodynamical shocks in W44	1
An observational view of particle acceleration in cosmic ray sources	1
Charged-particle heating in imbalanced MHD turbulence	1
Cosmic Ray Transport in the Astrospheres of Solar Twins	2
Cosmic Ray diffusion in magnetized turbulence	2
Cosmic Ray driven instabilities	2
Cosmic Ray propagation close to their acceleration site	2
Cosmic Rays in star forming galaxies	2
Cosmic ray driven winds	2
Cosmic ray propagation in local magnetic fields	2
Cosmic-Ray Ionization of Molecular Clouds	3
Cosmic-ray heating of molecular cloud cores	3
Cosmic-ray induced ionization of a molecular cloud shocked by the W28 supernova remnant	3
Direct detection of cosmic rays: Recent observational progresses	3
Gamma Rays from supernova remnants	3
Gamma-ray emission from supernova remnants	3
Gas towards the gamma-ray sources HESS J1731-347 and HESS J1729-345	3
Hadronic TeV emission of the supernova remnant W51C observed with the MAGIC Telescopes?	4

High energy emission from massive star clusters	4
Hydrodynamics of Young Supernova Remnants and the Implications for their Gamma-ray emission	4
Informations from Very High Energy Muons and Neutrinos contained in Extensive Air Shower cores	4
Irradiated shocks in the W28 A2 star-forming region: sites of cosmic-ray acceleration ? .	4
Localized SiO emission triggered by the passage of the W51C supernova remnant shock	4
Localized SiO emission triggered by the passage of the W51C supernova remnant shock	4
Low-Energy Cosmic Rays in the Galactic Center Region	5
Magnetic field structure from cosmic ray driven dynamo in spiral galaxies	5
Non-Thermal Radiation from the Inner Galaxy	5
Origin of Cosmic Rays	5
Particle acceleration in Supernovae and subsequent gamma-ray emission	5
Particle acceleration in the stellar graveyard and the case of young SNRs	5
Picard: A new Code for The Galactic Cosmic Ray Propagation Problem	5
Polarized thermal dust emission from Planck	6
Propagation of cosmic rays into diffuse clouds	6
Propagation of high-energy cosmic-ray electrons in the interstellar medium	6
Proton analysis with AMS-02 and solar modulation level	6
Recent results by Voyager	6
Recent results from Herschel	6
Relativistic cosmic-ray back-reaction instabilities along the background magnetic field .	6
SNR and molecular cloud associations as seen by H.E.S.S.	7
Secondaries from supernova remnants and new AMS-02 data	7
Synchrotron emission from molecular clouds	7
TeV sources in the Cygnus region observed with VERITAS	7
The Contribution of Cosmic Rays Interacting With Molecular Clouds to the Galactic Center Gamma-Ray Excess	7
The Multi-wavelength ISM: from CRs to dust emission	7
The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + Results from Voyager	7

The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + reports on Voyager results	8
The highest galactic cosmic ray energies	8
The impact of magnetic turbulence spectrum on particle acceleration in SNR IC443	8
The role of cosmic rays on magnetic field diffusion and the formation of protostellar discs	8
Voyager 1 events and GCR data since 2012	8
Welcome	8
Wide-Field Polarimetry: A Unique Probe of Interstellar Turbulence	8
Wind-driven Exclusion of Cosmic Rays in the Protoplanetary Disk Environment	9
X-shape magnetic fields in galactic halos	9
X-shape magnetic fields in galactic halos	9

Poster presentation / 110

3D simulations of the emission from young supernova remnants including particle acceleration

Auteur(s) contact: gferrand@physics.umanitoba.ca

Multiwavelength view of cosmic ray sources / 103

A Catalogue of High-Energy Observations of Galactic Supernova Remnants

Auteur(s) contact: gferrand@physics.umanitoba.ca

The cosmic ray spectrum / 77

A database of charged cosmic rays (CRDB) and constraints on the interstellar flux

Auteur(s) contact: dmaurin@lpsc.in2p3.fr

Cosmic Ray propagation / 101

A solution to the cosmic ray anisotropy problem

Auteur(s) contact: pmertsch@stanford.edu

The turbulent Interstellar medium / 94

APEX observations of non-stationary magneto-hydrodynamical shocks in W44

Auteur(s) contact: sibylle.anderl@obs.ujf-grenoble.fr

Multiwavelength view of cosmic ray sources / 18

An observational view of particle acceleration in cosmic ray sources

Cosmic Ray propagation / 99

Charged-particle heating in imbalanced MHD turbulence

Auteur(s) contact: martin.weidl@ipp.mpg.de

Low energy cosmic rays / 86

Cosmic Ray Transport in the Astrospheres of Solar Twins

Auteur(s) contact: pr33@st-andrews.ac.uk

Cosmic Ray propagation / 31

Cosmic Ray diffusion in magnetized turbulence

Plasma instabilities and cosmic rays / 23

Cosmic Ray driven instabilities

Cosmic Ray propagation / 32

Cosmic Ray propagation close to their acceleration site

Cosmic ray sources: theory / 81

Cosmic Rays in star forming galaxies

Auteur(s) contact: pierrick.martin@irap.omp.eu

Plasma instabilities and cosmic rays / 33

Cosmic ray driven winds

Poster presentation / 112

Cosmic ray propagation in local magnetic fields

Low energy cosmic rays / 25

Cosmic-Ray Ionization of Molecular Clouds

Low energy cosmic rays / 87

Cosmic-ray heating of molecular cloud cores

Auteur(s) contact: galli@arcetri.astro.it

Low energy cosmic rays / 84

Cosmic-ray induced ionization of a molecular cloud shocked by the W28 supernova remnant

Auteur(s) contact: solenn.vaupre@obs.ujf-grenoble.fr

The cosmic ray spectrum / 19

Direct detection of cosmic rays: Recent observational progresses

Multiwavelength view of cosmic ray sources / 74

Gamma Rays from supernova remnants

Auteur(s) contact: diane.fernandez@lupm.univ-montp2.fr

72

Gamma-ray emission from supernova remnants

Auteur(s) contact: diane.fernandez@lupm.univ-montp2.fr

Poster presentation / 111

Gas towards the gamma-ray sources HESS J1731-347 and HESS J1729-345

Auteur(s) contact: nigel.maxted@univ-montp2.fr

Multiwavelength view of cosmic ray sources / 47

Hadronic TeV emission of the supernova remnant W51C observed with the MAGIC Telescopes?

Cosmic ray sources: theory / 22

High energy emission from massive star clusters

Cosmic ray sources: theory / 80

Hydrodynamics of Young Supernova Remnants and the Implications for their Gamma-ray emission

Auteur(s) contact: vikram@oddjob.uchicago.edu

Poster presentation / 107

Informations from Very High Energy Muons and Neutrinos contained in Extensive Air Shower cores

Auteur(s) contact: cherif.talai@univ-annaba.dz

The turbulent Interstellar medium / 95

Irradiated shocks in the W28 A2 star-forming region: sites of cosmic-ray acceleration ?

Auteur(s) contact: antoine.gusdorf@lra.ens.fr

92

Localized SiO emission triggered by the passage of the W51C supernova remnant shock

Auteur(s) contact: dumas@iram.fr

Low energy cosmic rays / 93

Localized SiO emission triggered by the passage of the W51C supernova remnant shock

Auteur(s) contact: dumas@iram.fr

The galactic center / 30

Low-Energy Cosmic Rays in the Galactic Center Region

Plasma instabilities and cosmic rays / 83

Magnetic field structure from cosmic ray driven dynamo in spiral galaxies

The galactic center / 29

Non-Thermal Radiation from the Inner Galaxy

Cosmic ray sources: theory / 21

Origin of Cosmic Rays

78

Particle acceleration in Supernovae and subsequent gamma-ray emission

Auteur(s) contact: mrenaud@lupm.univ-montp2.fr

Multiwavelength view of cosmic ray sources / 71

Particle acceleration in the stellar graveyard and the case of young SNRs

Cosmic Ray propagation / 98

Picard: A new Code for The Galactic Cosmic Ray Propagation Problem

Auteur(s) contact: ralf.kissmann@uibk.ac.at

The turbulent Interstellar medium / 89

Polarized thermal dust emission from Planck

Auteur(s) contact: edith.falgarone@ens.fr

Low energy cosmic rays / 85

Propagation of cosmic rays into diffuse clouds

Auteur(s) contact: morlino@arcetri.astro.it

Cosmic Ray propagation / 97

Propagation of high-energy cosmic-ray electrons in the interstellar medium

Auteur(s) contact: reda.attallah@univ-annaba.dz

Poster presentation / 109

Proton analysis with AMS-02 and solar modulation level

Auteur(s) contact: ghelfi@lpsc.in2p3.fr

48

Recent results by Voyager

The turbulent Interstellar medium / 27

Recent results from Herschel

Plasma instabilities and cosmic rays / 24

Relativistic cosmic-ray back-reaction instabilities along the background magnetic field

Multiwavelength view of cosmic ray sources / 73

SNR and molecular cloud associations as seen by H.E.S.S.

Poster presentation / 108

Secondaries from supernova remnants and new AMS-02 data

Auteur(s) contact: pmertsch@stanford.edu

The turbulent Interstellar medium / 91

Synchrotron emission from molecular clouds

Auteur(s) contact: aws@mpe.mpg.de

Multiwavelength view of cosmic ray sources / 75

TeV sources in the Cygnus region observed with VERITAS

Auteur(s) contact: maria.krause@desy.de

The galactic center / 96

The Contribution of Cosmic Rays Interacting With Molecular Clouds to the Galactic Center Gamma-Ray Excess

Auteur(s) contact: chris.gordon@canterbury.ac.nz

The turbulent Interstellar medium / 28

The Multi-wavelength ISM: from CRs to dust emission

The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + Results from Voyager

Auteur(s) contact: isabelle.grenier@cea.fr

Multiwavelength view of cosmic ray sources / 102

The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + reports on Voyager results

Auteur(s) contact: isabelle.grenier@cea.fr

The cosmic ray spectrum / 20

The highest galactic cosmic ray energies

Cosmic ray sources: theory / 79

The impact of magnetic turbulence spectrum on particle acceleration in SNR IC443

Auteur(s) contact: igor.telezhinsky@desy.de

Plasma instabilities and cosmic rays / 82

The role of cosmic rays on magnetic field diffusion and the formation of protostellar discs

Auteur(s) contact: marco.padovani@lupm.univ-montp2.fr

100

Voyager 1 events and GCR data since 2012

17

Welcome

The turbulent Interstellar medium / 88

Wide-Field Polarimetry: A Unique Probe of Interstellar Turbulence

Auteur(s) contact: bryan.gaensler@sydney.edu.au

Low energy cosmic rays / 26

Wind-driven Exclusion of Cosmic Rays in the Protoplanetary Disk Environment

90

X-shape magnetic fields in galactic halos

Plasma instabilities and cosmic rays / 104

X-shape magnetic fields in galactic halos

Auteur(s) contact: katia.ferriere@irap.omp.eu
