

# Cosmic rays & their interstellar medium environment CRISM-2014

**mardi 24 juin 2014**

**Multiwavelength view of cosmic ray sources (09:15 - 10:30)**

-Présidents de session: Luke Drury

time	[id]	title	presenter
09:15	[18]	An observational view of particle acceleration in cosmic ray sources	Dr VINK, Jacco
10:00	[47]	Hadronic TeV emission of the supernova remnant W51C observed with the MAGIC Telescopes?	Dr KRAUSE, Julian

**Multiwavelength view of cosmic ray sources (11:00 - 12:00)**

-Présidents de session: Vikram Dwarkadas

time	[id]	title	presenter
11:00	[71]	Particle acceleration in the stellar graveyard and the case of young SNRs	ACERO, Fabio
11:30	[103]	A Catalogue of High-Energy Observations of Galactic Supernova Remnants	Dr FERRAND, Gilles

**Multiwavelength view of cosmic ray sources (14:00 - 15:50)**

-Présidents de session: Jacco Vink

time	[id]	title	presenter
14:00	[73]	SNR and molecular cloud associations as seen by H.E.S.S.	TRICHARD, Cyril
14:30	[74]	Gamma Rays from supernova remnants	FERNANDEZ, Diane
15:00	[75]	TeV sources in the Cygnus region observed with VERITAS	Mlle KRAUSE, Maria
15:20	[102]	The cosmic-ray, dust, and gas content of the local Chamaeleon clouds + reports on Voyager results	GRENIER, Isabelle
