

Example (deprecated)

The screenshot shows the XML content of the file `E:\cyghome\projects\jwgen\etc\CEProfiles.xml` in Microsoft Internet Explorer. The XML defines CEProfiles for the site, including descriptions, declarations, group sets, and CE instances.

```
<CEProfile description="Tier 1 - LCG - sous-profil B">
  <Declaration>
  <GroupSet>
    <except>
      <Group name="alice" />
      <Group name="atlas" />
    </except>
  </GroupSet>
</Declaration>
<CEInstance hostname="cclcgceli04.in2p3.fr">
  <Declaration />
</CEInstance>
<CEInstance hostname="cclcgceli08.in2p3.fr">
  <Declaration />
</CEInstance>
</CEProfile>
<CEInstance hostname="cccreamceli01.in2p3.fr">
  <Declaration />
</CEInstance>
</CEProfile>
</CEProfile>
<CEProfile description="Tier 2">
  <Declaration>
    <Site>IN2P3-CC-T2</Site>
    <Tier>tier2</Tier>
  </Declaration>
  <GroupSet>
    <refines>
      <Group name="cmsf">
        <User prefix="cmsgrid">
          <Project>P_cmsf_T2prod</Project>
        </User>
        <User prefix="cms100">
          <Project>P_cmsf_T2prod</Project>
        </User>
        <Project>P_cmsf_T2analyse</Project>
      </Group>
    </refines>
    <Group name="alice" />
    <Group name="atlas">
      <User prefix="atlagrid">
        <Project>P_atlas_T2prod</Project>
      </User>
      <User prefix="atlas099">
        <Project>P_atlas_T2ana</Project>
        <SubmissionPolicy>ACCEPT</SubmissionPolicy>
      </User>
    </Group>
  </GroupSet>
  <LogicalResourceSet>
    <extends>
      <LogicalResource name="xrootd" />
    </extends>
  </LogicalResourceSet>
</CEProfile>
```
