Dark matter goes social: Impact on structure formation

mardi 15 juillet 2014 17:30 (1 heure)

We present our results studying the impact of DM-photon and DM-neutrino interactions on the structure formation in the late Universe potentially solving several problems of CDM and constraining the possible interaction strength.

Based on work done with Jascha A. Schewtschenko, Ryan Wilkinson, Celine Boehm, Silvia Pascoli, Carlton Baugh
arXiv:1310.8214 (and others still in preparation)

Orateur: SCHEWTSCHENKO, Jascha

Classification de Session: Poster presentation
