

Third general meeting of the ISOTTA project

mercredi 18 décembre 2013 - mercredi 18 décembre 2013

CSNSM - Orsay

Programme Scientifique

The third ISOTTA meeting will concern presentations of the activities and of the results related to the second year of the project and contributions and discussions on topics relevant to the ISOTTA programme.

Results on luminescent bolometers (LUMINEU, LUCIFER and other approaches)

Status of the BiPo detector in the framework of the SuperNEMO experiment

Alpha and gamma spectrometers for low radioactivity measurements

Preparation of the future common measurements as planned by the Measurement Coordination Panel
